

# Kaiser Permanente Feeds Overnight Staff

A hospital in Southern California sells fresh food 24/7 with a FoodSpot Smart Fridge

## Problem

The café closes from 9 pm to 6 am, leaving the overnight staff without access to fresh food.

## Solution

The manager launched a FoodSpot smart fridge to feed the overnight staff and act as a line-buster during peak periods.

*The fridge has been really great because it allows me to grab something fresh to eat when the cafeteria is closed.*

**\$3000**

Monthly sales

**10 pm-5 am**

Peak sales period

*It's really a hands-off machine: you fill it up and let it do its thing. The smart fridge is 1000% something every cafeteria should look into. The feedback has only been positive.*

**Drew**  
Café Manager
